

Options Settings in jD 3.9 series

These are in 13 Sections and accessed by selecting the relevant Tab. In total there are about 180 options that may be configured; some options actually have multiple fields such as height and width of an image but they are only shown as a single option here.

Hints

This section gives some brief general advice, specifically about the additional **User Group Setting** and the use of **Multiple Languages**

Path Settings

Upload directory path
